[Quiet American](#) is Aaron Ximm's geographic sound recording project and in listening he hopes to transport us to somewhere new. There are loads of small sound clips from his [field recordings](#) made in Vietnam and also the amazing [Vox Americana - Echolocations Volume 1](#). Vox Americana is a collection of ambient compositions that have been created with the aforementioned sound clips. There are also loads more compositions made from other [field recordings](#) (links at the top of the page) from elsewhere around the world including San Fran', Fiji and Burma...links to these recordings are the square boxes at the top of the pages. Next download for me is S3, a 74 minute unedited train journey from Hanoi. Can't wait to hear all the other pieces.
